EDUCATION

Higher Secondary
Pandu College
2020 - 2021

Bachelor's Degree
Guwahati University
BSc (Hons) in Computer Science
2021 - 2024

SKILLS

- Java , Python , JavaScript
- Debugging
- Microsoft Office's
- DBMS , SQL
- Android Development
- Internet Technologies
- ReactJS , Expo
- REST API's
- Spring MVC & Spring Boot
- Data Management
- Firebase Cloud Integration
- Networking

PROFESSIONAL OVERVIEW

A highly motivated and detail-oriented recent graduate with a BSc in Computer Science. Equipped with strong analytical and software development architecture, I bring a technical perspective to complex issues. Eager to apply my knowledge of software development, project management, and technology in a legal or tech-oriented environment. Committed to continuous learning and growing within both the technology and legal sectors.

EXPERIENCE

ANDROID APP DEVELOPMENT PROJECTS · DURING ACADEMICS

- Developed Android application using Java and Android Studio as part of coursework.
- Integrated Firebase into the application to enable real-time data exchange.
- Collaborated with team members to design and implement features, focusing on user experience and functionality.
- Conducted testing and debugging to ensure high-performance and user-friendly applications.
- Implemented a java database connectivity using JSP as a frontend and implement a CRUD operation to MySQL database

Self-initiated Project.

- React Native(Expo) – Developed and Lyrics App where users can edit lyrics view and implemented the search functionality within the app .
- Designed and developed a web application using Spring MVC for backend architecture and hibernate for database management.
- Implemented key functionalities, including CRUD operations, user request handling using RESTful APIs.
- Worked with a MySQL database to manage and store data efficiently, seamlessly integrating it with the Spring framework.
- Applied best practices in code organization, testing, and version control to ensure robustness and maintainability of the application.
